Purchasing Windows Tablets

Item 1 of 2

There is no doubt the age of Tablets and iPads is here, and they are unlikely to be a passing phase, but an important part of our business environment. Purchasing wisely is most important as many companies will have 5 to 100 Tablets and iPads in their work place.

Remember, Tablets and iPads are not full blown computers, they cannot be expected to perform like your office computers.

Step 1:

Know the application you need the Tablet or iPad for. Eg. Business, using CavSoft in your service vehicles, or on building & construction sites.

Step 2:

Focus on what you are being advised by the software provider. Eg. CavSoft needs Tablets with MS Windows 7, or 8 when released. CavSoft will be compatible with Apple iPads at the end of May 2012. Followed by Android technology in August 2012.

Step 3

Use your existing Telco provider, Telstra, Optus, Virgin, Vodaphone or whoever, it makes little difference for your 3G connection.

Step 4

Go to your Telco's website and see the special deals, you are unlikely to do better. There were eighty (80) choices at a recent computer show. We are confident you will find one that suits your purpose.

Important

To run CavSoft as at April 2012, the Tablet must have MS Windows 7. 2GB to 4GB RAM, Intel processor is preferable and as much speed and hard drive as you can get. But 64GB hard drive is plenty.

The 3G connection only needs 4GB download.

Think carefully about saving $10.00 a month, when this project is going to make you thousands of dollars extra per month.

Item 2 of 2

Good news about CavSoft Site Manager.

Appreciating that the software application you are purchasing for CavSoft Site Manager is around $3,990.00 a copy. We are providing it on a subscription basis, no upfront costs.

a) First month FREE.
b) Cost is $83.25 GST inc.
c) If you need to upgrade your head office CavSoft Service Work or Project Tracking this can be bundled with the monthly subscription.
d) For each Tablet, your twelfth (12) month will be FREE. (Loyalty rewards)
